

### Lena Takamori – Artist Statement

Lena Takamori explores her interest in dualities and interiorities in her latest body of work. 'Ground Clouds', a reference to fog, presents a range of sculptural works - figurative, vessel and landscape. Her landscape and skeleton forms explore the feeling of presence within spaces of absence. Her bird and figurative forms speak to deeply embedded interiorities. As fog descends and settles, the limitations of what we can perceive meets the expansiveness of what we can only imagine.
